Cookie Policy

Enlight Advisory · Version 1.0 · Last updated: 19 September 2026

The short version

This website sets no cookies of its own. We use no analytics, no advertising technology, no social media pixels and no cross-site tracking of any kind.

What cookies are

A cookie is a small text file a website asks your browser to store, so that the site can recognise your browser on a later page or a later visit. Cookies are useful for things like keeping you logged in. They are also the mechanism behind most of the tracking that happens on the internet.

Cookies this website uses

As of the date of this policy, we do not intentionally deploy any cookies.

If a strictly necessary cookie is used by our hosting or security infrastructure — for example, to protect a form or the website against automated abuse — it will be used only for the relevant technical or security purpose.

If we introduce cookies or similar technologies that are not strictly necessary for the operation of the website, we will update this Cookie Policy and list each of them in the table below.

Requests to other companies

This website currently loads typefaces from Google's font servers. Although this does not itself constitute the use of a cookie by our website, loading those resources may involve your browser communicating with Google and transmitting information such as your IP address.

There are no other third-party requests from this website.

What we do not do

At the date of this policy:

- We do not use Google Analytics or any other analytics product
- We do not use advertising or retargeting pixels from any network
- We do not embed social media trackers
- We do not build profiles of visitors from their browsing of this website
- We do not share browsing data with anyone, beyond the ordinary server logs described in our Privacy Policy

Controlling cookies yourself

Most browsers allow you to block, delete or otherwise control cookies through their privacy or security settings. Because this website does not currently rely on non-essential cookies, blocking such cookies should not affect the ordinary functioning of the website.

If this changes

If we introduce analytics, advertising, social-media technologies or other non-essential cookies, we will update this Cookie Policy to identify the relevant technologies, their purposes and applicable retention periods, and will obtain consent where required by applicable law before activating them.
